PRESENTATION OF THE RAJAPI-COP AFRICA ORGANIZATION

Network of Young Africans Bringing Innovative Projects to the COPs on Climate, Biodiversity, and Desertification for Social Justice and Gender. (RAJAPI-COP) is a dynamic pan-African organization currently being structured to operate across more than 24 African countries.

Our Mission

Our mission is to mobilize, support, and connect young people who design and lead concrete, integrated, and transformative solutions to address the challenges of climate change, biodiversity loss, desertification, and social and gender inequalities, in full alignment with the Sustainable Development Goals (SDGs) and the Paris Agreement.

Our Vision

African youth hold the key to a sustainable, just, and resilient future. By empowering their engagement, creativity, and leadership, we bridge global ambitions with local African action.

RAJAPI-COP is a pan-African platform catalyzing Climate-SDG synergies through youth-driven innovation.

Innovants aux COP Climat, Biodiversité,
Désertification pour la Justice Sociale et le Genre)

Promouvoir l'innovation des jeunes pour la justice climatique et la biodiversité

Our network is built around an innovative digital collaborative platform, designed as a strategic tool to :

- Identify, structure, and support youth-led projects in the fields of climate, biodiversity, and desertification, with a strong focus on gender and social justice.
- Align local initiatives with Nationally Determined Contributions (NDCs) and the SDG priorities of each African country.
- Provide virtual incubation, mentorship, and access to participatory funding opportunities.
- Bring together stakeholders (governments, private sector, civil society, international institutions) around high-impact youth projects.
- Generate empirical data to inform public policies, strengthen youth participation in decision-making processes, and enhance accountability.

Our Value Proposition

RAJAPI-COP translates Climate-SDG synergies into tangible, youth-led, and localized actions. Our approach :

- Answers the call of the Pact for the Future for transformative, inclusive, and intergenerational action.
- Implements the 2024 Expert Group Report on Climate-SDG synergies by bridging the gap between ambition and implementation on the ground.
- Contributes to the integration of youth in climate and sustainable development policies at all levels of governance.

Our Commitment

RAJAPI-COP is committed to playing a strategic role in Africa's sustainable development, alongside our partners, to amplify youth voices, scale up their solutions, and accelerate the transformation of African societies toward a greener, fairer, and more inclusive future.

Global Presentation of RAJAPI-COP

Network of Young Africans Bringing Innovative Projects to the COPs on Climate, Biodiversity, and Desertification for Social Justice and Gender. (RAJAPI-COP) is an ambitious pan-African initiative aimed at mobilizing, training, and connecting young African innovators in the fields of environment, climate, biodiversity, and desertification. Created to promote youth inclusion and

impact during the Conferences of the Parties (COPs), RAJAPI-COP positions itself as a strategic lever for innovation and cooperation on environmental and social issues.

RAJAPI-COP is a pan-African organization acting as a catalyst for innovative solutions to the environmental, climate, and social challenges facing Africa. Founded on the belief that youth hold the key to shaping a sustainable future, RAJAPI-COP mobilizes and supports young African leaders to transform environmental challenges into opportunities for development and innovation.

Now active in 24 African countries – including Cameroon, Benin, Gabon, Guinea-Conakry, Somalia, Zambia, Egypt, Senegal, Togo, Comoros, Mauritania, Nigeria, and Niger – the network continues to grow, bringing together dynamic and visionary actors around concrete and ambitious projects. Each national chapter acts in synergy to promote local initiatives adapted to specific territorial realities while contributing to coordinated action at continental and international levels.

Headquartered in Cameroon, RAJAPI-COP has become a key player in climate justice, social equity, and gender inclusion. Its main mission is to strengthen youth capacities, ensure their active participation in major international environmental negotiations, and promote sustainable solutions that integrate environmental, social, and economic dimensions.

In 2023, RAJAPI-COP reached a turning point by increasing its visibility and impact across Africa. National representations were established to implement innovative projects on the ground, while the network took part in major forums such as UN-Habitat, COP16 on Desertification, and other global platforms. These participations helped highlight young Africans' innovative ideas and establish strategic partnerships with key institutions and organizations.

RAJAPI-COP also stands out for its ability to mobilize and connect youth project leaders across Africa, creating a true community of learning and action. Network members benefit from training, technical support, and access to funding opportunities for their projects. These efforts are part of a long-term vision : building a resilient Africa where every young person plays an active role in addressing environmental crises and contributes to their country's sustainable development.

By combining local and global approaches, RAJAPI-COP positions itself as a model pan-African organization, proving that youth is a driving force capable of positively influencing climate policy, biodiversity preservation, and desertification control. With the support of its partners and members, RAJAPI-COP continues to lead the way toward a more inclusive, sustainable, and prosperous future for Africa.

Promouvoir l'innovation des jeunes pour la justice climatique et la biodiversité

RAJAPI-COP Objectives

- Promote Environmental Innovation : Identify and support young innovators leading projects in climate, biodiversity, and desertification across the African continent.
- Encourage Active Youth Participation : Prepare and support African youth for effective engagement in decision-making processes at COPs and other global environmental events.
- Strengthen Local and Regional Capacities : Train environmental leaders through tailored capacity-building programs, workshops, and educational initiatives adapted to local realities.
- Create a Dynamic Pan-African Network : Connect young African leaders with each other and with international partners to foster long-lasting and productive synergy.
- Develop Local Solutions with Global Impact : Support the implementation of local innovative projects with global replication potential to address critical environmental challenges.

Expected Impacts

- Strengthened Climate Resilience in Africa : Projects incubated by RAJAPI-COP aim to reduce climate change impacts on vulnerable communities.
- Emergence of a New Generation of African Leaders : Through targeted training and mentorship, RAJAPI-COP nurtures environmental leaders ready to influence international policies.
- Enhanced Cooperation Between Africa and Global Partners : By integrating African youth into international networks, RAJAPI-COP catalyzes transcontinental collaborations for climate and social action.
- Poverty Reduction Through Green Innovation :
- Supported projects generate green jobs and economic opportunities for youth through sustainable solutions.

The RAJAPI-COP Digital Platform

To address communication, coordination, and innovation challenges at the pan-African scale, RAJAPI-COP relies on a collaborative digital platform. This technological solution is central to its activities, connecting members and partners across countries.

Key Features :

- Project Management : Members can submit, manage, and track their projects directly on the platform.

- Online Collaboration : Collaborative tools allow regional teams to share resources, ideas, and coordinate their actions.
- Application Monitoring : Young innovators can apply for funding, partnerships, and events through the platform.
- Training Access : Webinars, educational modules, and capacity-building tools are available to members.
- Global Networking : Members can connect with other innovators, mentors, and partners worldwide.
- Analytical Dashboard : Real-time tracking of projects, secured funding, and measured impacts.

Our Regional Representations

RAJAPI-COP is progressively expanding across various African countries with regional offices. These offices, directly linked to the headquarters in Yaoundé, Cameroon, serve as local hubs for project identification, support, and implementation.

National Activity 1 : Reforestation Campaign in the Sahelian Regions of Cameroon (2022)

Event :

National reforestation campaign organized by RAJAPI-COP as part of its mission to restore degraded ecosystems and promote climate resilience.

Organizer :

Network of Young Africans Bringing Innovative Projects to the COPs on Climate, Biodiversity, and Desertification for Social Justice and Gender. (RAJAPI-COP), in partnership with :

The Ministry of Environment, Protection of Nature, and Sustainable Development (MINEPDED)

The Ministry of Forests and Wildlife (MINFOF)

Date and Location : March to June 2022

Affected regions : Extreme-North, North, Adamaoua, East, and Northwest Cameroon.

Objective of the Activity :

+237 696 967 609
+237 676 922 282

fonder.rajapicop@gmail.com

Promouvoir l'innovation des jeunes pour la justice climatique et la biodiversité

Address the growing effects of deforestation and desertification in the Sahelian regions of Cameroon by undertaking a concrete reforestation action, with objectives to :

- Restore degraded soils
- Combat erosion and aridity
- Promote citizen engagement and ecological awareness
- Strengthen the resilience of communities to climate change

Role and Contribution of RAJAPI-COP :

Design and launch of the initiative in 2022 with 400 young environmental engineers mobilized within the network Internal fund collection for the project's initiation Development of an action plan identifying priority sites

Successful advocacy with MINEPDED and MINFOF to obtain technical and institutional support

Coordination of field activities : community mobilization, logistical organization, monitoring of plantations

Establishment of local monitoring committees for the sustainability of results

Participants :

- 400 environmental engineers (active RAJAPI-COP members)
- Technicians from the regional delegations of MINEPDED and MINFOF
- Local authorities, traditional chiefs, and community leaders

Results / Impacts :

- 1,000 trees planted in 5 regions of the Sahelian area of Cameroon, with the selection of appropriate species (acacias, moringas, neem, etc.)
- Approximately 2,000 locals sensitized on sustainable forest resource management
- Creation of environmental monitoring committees at each planting site
- Strengthening the partnership between youth and public institutions for climate action
- Increased visibility and recognition of RAJAPI-COP as a key player in national community reforestation efforts

National Activity 2 : Integrated Program for Ecological Transition and Community Resilience in Northern Cameroon (2024)

Event :

Désertification pour la Justice Sociale et le Genre)

Promouvoir l'innovation des jeunes pour la justice climatique et la biodiversité

A multidimensional program initiated by RAJAPI-COP to strengthen technical skills among youth, promote access to renewable energy, raise environmental awareness among students, and support rural communities in sustainable land management.

Organizer :

Network of Young Africans Bringing Innovative Projects to the COPs on Climate, Biodiversity, and Desertification for Social Justice and Gender. (RAJAPI-COP), in partnership with Cameroon Youths in Solar Energy (CYSE – First Cohort), regional delegations of the Ministry of Environment (MINEPDED), secondary schools, and local traditional authorities.

Date and Location :

January to October 2024, in the three regions of Northern Cameroon (Adamaoua, North, Far North), with a central training phase held in Yaoundé.

Specific Objectives of the Activity :

1. Strengthen local technical expertise through training 50 young technicians from the Sahelian regions in the installation, maintenance, and management of autonomous solar systems.
2. Promote environmental education among youth by sensitizing 1,000 students in 15 secondary schools on climate change, biodiversity, and sustainability.
3. Reinforce ecosystem resilience by adopting sustainable land management practices in 15 rural communities in the Adamaoua region.

RAJAPI-COP's Specific Role and Contribution :

- Identifying and mobilizing beneficiaries : Selected 50 young technicians from Adamaoua, North, and Far North regions, ensuring gender equity and inclusion of marginalized areas.
- Organized logistics and financial support to transport selected youth to Yaoundé for an intensive solar energy training program, led by CYSE.
- Coordinated post-training deployment of solar systems : supported trainees in installing off-grid solar units in 1,000 rural households.
- Developed tailored educational content on climate and environmental issues for use in 15 schools.
- Led interactive workshops and launched environmental clubs in 10 schools to sustain engagement beyond the initial awareness phase.
- Provided technical and social support for adopting sustainable land practices (mulching, village reforestation, composting, etc.) in 15 communities.

Promouvoir l'innovation des jeunes pour la justice climatique et la biodiversité

Participants :

- 50 young technicians trained in solar energy (40% women).
- 1,000 students and teachers sensitized in 15 secondary schools.
- Traditional leaders, farmers, and households from 15 beneficiary villages engaged in land management activities.
- Expert trainers from RAJAPI-COP and CYSE, MINEPDED representatives, local authorities, and partner NGOs.

Concrete Results / Impacts :

- Professional empowerment of 50 trained youth now active as solar installers.
- Solar electrification of 1,000 households in remote areas, improving access to education, healthcare, and safety.
- Emergence of a new generation of eco-conscious students, with 10 active environmental clubs in northern Cameroon schools.
- Improved local land governance through community-level adoption of sustainable land management techniques.
- Green job creation and promotion of locally adapted climate solutions.
- Enhanced visibility of RAJAPI-COP as a catalyst of integrated, community-driven solutions for energy, education, and ecology.

National Activity 3 : Environmental Education Program in Cameroonian Secondary Schools (2023)

Event :

National awareness and environmental education campaign targeting secondary school students.

Organizer :

Network of Young Africans Bringing Innovative Projects to the COPs on Climate, Biodiversity, and Desertification for Social Justice and Gender. (RAJAPI-COP)

Partners and Support :

- NGO Global Village Cameroon
- Regional Delegations of the Ministry of Secondary Education
- School leadership and administrators
- Civil society environmental networks

Promouvoir l'innovation des jeunes pour la justice climatique et la biodiversité

Date and Location :

January to November 2023 – 15 secondary schools in the Centre, Littoral, and Adamaoua regions (Cameroon)

Specific Objective of the Activity :

To strengthen youth engagement in the fight against climate change through environmental education. The program aimed to equip students with essential knowledge of current ecological challenges, promote environmental citizenship at a young age, and encourage local sustainable action.

RAJAPI-COP's Exact Role and Contribution :

Program design : RAJAPI-COP developed the educational content and awareness tools in collaboration with environmental and educational experts.

Resource mobilization : Coordinated partnership efforts (including Global Village Cameroon and others) and logistics.

Implementation : Conducted workshops, led conferences, mentored student ambassadors, and supervised the creation of school environmental clubs.

Monitoring and evaluation : Established progress tracking tools, participation indicators, and local focal points in each participating school.

Participants :

- Over 26.000 students from 15 secondary schools
- Teachers and school administrators
- 15 facilitators and environmental educators mobilized by RAJAPI-COP
- Representatives from Global Village Cameroon
- Local authorities, parent associations, and community leaders

Activities Conducted :

- Interactive conferences on causes and effects of climate change and local response strategies
- Training of 45 "Youth Climate Ambassadors" selected to lead peer awareness and initiatives within schools
- Creation of 10 environmental school clubs with official charters, planting kits, and waste-sorting tools

- Organization of 5 “Green School Days” involving campus tree planting, public space cleanup, and interschool eco-contests
- Educational film screenings followed by expert-led debates
- Introduction to carbon footprint calculation and basic green entrepreneurship skills

Results and Impacts :

- Direct awareness of 1,000 young people on climate issues and environmental citizenship
- Sustainable ecological dynamics initiated in 10 schools through active environmental clubs
- Visible reduction in school waste, adoption of practices like waste sorting and tree planting
- Increased teacher capacity in delivering climate education
- Blueprint for RAJAPI-COP Senegal : This successful experience served as a foundation to launch similar initiatives in other countries of the network

National Activity 4 : Reforestation and Wetland Conservation along the Sanaga Riverbanks (Littoral, Cameroon – 2024)

Event :

National campaign for the preservation and restoration of wetlands as part of World Environment Day (June 5th) activities.

Main organizer :

Network of Young Africans Bringing Innovative Projects to the COPs on Climate, Biodiversity, and Desertification for Social Justice and Gender. (RAJAPI-COP)

Partners and Supporters :

- Regional Delegations of the Ministry of Environment, Nature Protection and Sustainable Development (MINEPDED)
- Local municipalities in the Sanaga Maritime Division
- Traditional authorities and community associations
- University of Douala (Faculty of Sciences / Ecology Laboratory)
- Local NGOs specialized in wetland conservation
- Youth environmental network in the Littoral region

May to July 2024 – Left bank and marshlands adjacent to the Sanaga River, Littoral Region, Cameroon.

Specific Objective of the Activity :

To restore degraded wetland ecosystems along the Sanaga River, raise community awareness of their ecological importance, and strengthen youth involvement in their sustainable management.

Role and Exact Contribution of RAJAPI-COP :

- Strategic planning of the initiative, including the design of a wetland-specific restoration and education program
- Mobilization of over 200 young volunteers, members, and partners from the RAJAPI-COP Littoral network
- Facilitation of community awareness sessions and environmental workshops on the ecological functions of wetlands
- Coordination of reforestation activities in collaboration with local authorities and scientists
- Creation and distribution of educational materials (leaflets, posters, videos, podcasts, infographics)
- Organization of webinars and regional/international dialogues on sustainable wetland management
- Implementation of participatory reforestation actions, including the planting of 3,000 trees along vulnerable riverbanks

Participants :

- 200 youth volunteers and students mobilized by RAJAPI-COP
- Faculty and students from the University of Douala
- Regional delegates from MINEPDED
- Traditional leaders and local community representatives
- Partner NGOs and local grassroots actors
- General public through online and physical awareness campaigns

Activities Carried Out :

- Ecological clean-up of Sanaga Riverbanks and degraded marshlands
- Participatory reforestation using species adapted to wetland environments (e.g., *Raphia*, *Acacia mangium*, *Terminalia superba*)
- Training sessions on integrated wetland management

- Installation of educational signage in three riverside villages
- Public roundtable with government, academia, and NGOs on local wetland policies
- Online sensitization campaign (webinar on "Wetlands and Climate in Africa", thematic podcast, educational videos)
- Participatory inventory of local wetlands in collaboration with ecological researchers and students

Results / Impacts :

- 3,000 trees planted in four marshland zones along the Sanaga
- Over 5,000 people indirectly reached through physical and digital campaigns
- Creation of four local committees for community-based wetland management
- Capacity building for 200 youth on wetland ecological services
- Increased visibility of RAJAPI-COP as an innovative actor in ecological restoration
- Six educational tools developed and distributed in schools and target communities
- Contribution to Cameroon's national commitments under the Ramsar Convention and SDGs 13 & 15

Outlook :

Launch of an annual "Youth for Wetlands" campaign across other river basins in Cameroon and the sub-region

Development of a participatory mobile app for community monitoring of wetland health

Expansion of the pilot project to other threatened wetland areas (coastal

International Activity 1 : "Biodiversity Challenge – Let's Play for the Planet !" (COP15, Montreal, 2022)

Event :

Side event organized during the 15th Conference of the Parties (COP15) to the Convention on Biological Diversity (CBD), held in Montreal, Canada, in December 2022. This innovative format focused on interactive and educational games to raise awareness about biodiversity conservation and ecosystem protection.

Organizer :

Network of Young Africans Bringing Innovative Projects to the COPs on Climate, Biodiversity, and Desertification for Social Justice and Gender. (RAJAPI-COP), in partnership with Global

Village Cameroon, EarthEcho International, and several international educational and environmental institutions.

Date and Location :

December 7–19, 2022, at the Palais des congrès de Montréal, with virtual extensions in several French-speaking African countries (including Cameroon, Senegal, and the DRC).

Specific Objective of the Activity :

To use educational board games and interactive challenges to involve youth and raise awareness about biodiversity, endangered ecosystems, and nature-based solutions, turning environmental communication into a fun, participatory, and intergenerational experience.

RAJAPI-COP's Role and Contributions :

- Full design and development of the "Biodiversity Challenge" concept
- Creation of educational content (quizzes, role-play, game boards, visuals)
- Logistical organization and animation of the COP15 side event
- Mobilization of African youth leaders onsite and online
- Development of digital toolkits for local rollouts in Africa
- Promotion of the activity during COP15 youth panels

Activities Conducted :

- Biodiversity Quiz : Interactive competition on flora, fauna, ecosystems, and endangered species
- Nature Escape Game : Immersive role-play to "save" a threatened ecosystem through puzzles
- Eco Mission : Team-based problem-solving of realistic environmental challenges
- Ecosystem Race : Board game where each team represents an ecosystem facing threats (deforestation, pollution, climate change)
- Zero Extinction Campaign Workshop : Youth-created environmental awareness campaigns
- Debriefing webinars to share experiences and lessons learned after COP15

Participants :

- Youth leaders from 10 African countries (Cameroon, Chad, Senegal, DRC, Côte d'Ivoire, Gabon, Benin, Burkina Faso, Niger, Congo)
- Youth delegates from national representations at COP15

- International NGOs active in environmental education (EarthEcho, Youth4Nature, Coalition WILD)
- Partner institutions : CBD Secretariat, UNESCO, IUCN, COMIFAC

Results / Impacts :

- Over 400 youth sensitized in Montreal and 600+ in Africa through regional events
- Prototype of the board game developed (available in print and digital, in French and English)
- Creation of 10 "Biodiversity Challenge" clubs in pilot schools and universities in Central and West Africa
- Game integrated as an educational tool in RAJAPI-COP's awareness campaigns
- Enhanced international visibility for RAJAPI-COP as an innovative actor in youth environmental education
- Inspiration for similar formats used at later events, including the UN STI Forum (2023–2025)

Outlook :

- Launch of an annual continental edition of the "Biodiversity Challenge"
- Development of a participatory mobile app based on the game's modules
- Integration of the game into environmental education curricula in collaboration with African education ministries
-

International Activity 2 : Participation in the Central African Youth Forum for Forests and the 20th Meeting of the Parties of the Congo Basin Forest Partnership (CBFP) – Kinshasa, DRC (2024)

Event :

Central African Youth Forum for Forests, held alongside the 20th Meeting of the Parties (MOP20) of the Congo Basin Forest Partnership (CBFP), under the theme : "Forests and Environmental Governance for Sustainable Peace."

Organizer :

COMIFAC (Central African Forests Commission), CBFP, Congolese authorities, the OIF (Organisation Internationale de la Francophonie), and civil society organizations from Central Africa.

Date and Location : May 31 to June 1, 2024, in Kinshasa, Democratic Republic of the Congo.

Promouvoir l'innovation des jeunes pour la justice climatique et la biodiversité

Objective of the Activity :

To promote the engagement of African youth in forest and environmental governance through the presentation of scientific, innovative, and collaborative initiatives, and to amplify the voice of Congo Basin youth in conservation policy-making.

Role and Specific Contribution of RAJAPI-COP :

- Active coordination of the youth delegation from several Central African countries (Cameroon, DRC, Congo, Gabon, Chad).
- Selection and support of young project leaders for the promotion of their initiatives during the forum.
- Official presentation of the “CongoBotanika” project, a pilot ecological mapping initiative led by RAJAPI-COP.
- Technical representation by Loïc Moukagni, Head of the Projects and Environmental Education Department, in scientific panels.
- Facilitation of an exhibition stand showcasing technological innovations for conservation.
- Contribution to the drafting of youth recommendations adopted at the end of the Forum.

Workshop and Project Presented :

“Integrated Mapping and Typology of Vegetation Formations in the Protected Areas of the Congo Basin : Toward a Multi-Source and Robust Approach for Improved Ecological Governance and Sustainable Regional Cooperation.”

> This project, led by RAJAPI-COP, aims to mobilize remote sensing, artificial intelligence, field data, and regional collaboration to enhance knowledge, management, and protection of the Congo Basin’s vegetation formations, supporting transboundary conservation efforts.

Participants :

- Youth environmental leaders from 11 COMIFAC countries
- Representatives from the Ministries of Environment of DRC, Cameroon, Gabon, etc.
- Experts from CBFP, OFAC, GIZ, CIFOR, WWF, and FAO
- Representatives of research institutions (University of Kinshasa, IRAD, University of Dschang)
- Members of regional youth networks (YILF, AYICC, DYF)

Promouvoir l'innovation des jeunes pour la justice climatique et la biodiversité

- Recognition of the CongoBotanika project as a regional flagship initiative for protected areas
- Capacity building of 60 youth participants in ecological mapping technologies
- Youth recommendations included in the final report of the CBFP MOP20
- Synergies established between RAJAPI-COP and other regional actors (e.g., DYF, DYGLAF)
- Preliminary partnership initiated with COMIFAC for a pilot deployment of the project in Cameroon and DRC
- Strengthening of African youth's environmental diplomacy in regional negotiation processes

Perspectives :

- Development of the CongoBotanika Youth Labs program, offering regional training workshops in ecological mapping
- Creation of a best practices manual for participatory vegetation typology
- Advocacy for the inclusion of young researchers in the technical bodies of COMIFAC and CBFP
- Launch of pilot projects in DRC, Cameroon, and Gabon starting in 2025 with support from international partners

International Activity 3 : Roundtable on the Restoration of African Ecosystems – Nairobi, Kenya (2023)

Event : Thematic roundtable held as part of World Environment Day 2023, under the theme : "Restoring African Ecosystems : Challenges, Innovations and Cooperation"

Location : Nairobi, Republic of Kenya

Date : June 5, 2023

Organizer :

Network of Young Africans Bringing Innovative Projects to the COPs on Climate, Biodiversity, and Desertification for Social Justice and Gender. (RAJAPI-COP) in collaboration with RAJAPI-COP Kenya, as part of the official launch of the network in the country and the first National General Assembly.

Objectives of the Activity :

Promouvoir l'innovation des jeunes pour la justice climatique et la biodiversité

- Promote knowledge-sharing between youth leaders, experts and institutional partners on effective ecosystem restoration strategies adapted to the African context.
- Showcase local and regional initiatives in reforestation, soil regeneration, anti-desertification, and sustainable natural resource management.
- Strengthen South-South cooperation among RAJAPI-COP member countries, initiating collaborative projects focused on restoring degraded ecosystems.
- Support the continental expansion of RAJAPI-COP through structured national representations and high-level participatory scientific events.

Roundtable Highlights :

- Opening session with representatives of RAJAPI-COP Africa, Kenya's Ministry of Environment, and partner organizations.
- Panel 1 – African Innovations in Reforestation and Sustainable Agriculture
- Presentations by young entrepreneurs and researchers.
- Panel 2 – Governance and Cooperation for Ecological Restoration
- Exchanges on financing mechanisms, public-private partnerships, and community-led action.
- Participatory Workshop : Co-creating a Youth Agenda for Ecosystem Restoration
- Drafting a collective action-oriented position paper.
- Official General Assembly of RAJAPI-COP Kenya
- Presentation of the national strategic plan and election of the coordination committee.

RAJAPI-COP's Expansion Strategy :

- RAJAPI-COP is now established in 24 African countries and is actively working toward covering all 54 African countries by the end of 2027.
- This roundtable in Nairobi marked a key step in the structured rollout of the network at the national level by :
 - Mobilizing Kenyan youth around biodiversity and restoration issues ;
 - Forming a core group of locally engaged and regionally connected actors ;
 - Promoting synergies and continental cohesion among RAJAPI-COP national teams.

Key Outcomes :

- Official establishment of RAJAPI-COP Kenya, with an elected national board and validated 2023–2024 action plan.
- Development of a youth strategic policy document on ecosystem restoration in East Africa.

Promouvoir l'innovation des jeunes pour la justice climatique et la biodiversité

- Strengthened partnerships between RAJAPI-COP Africa and Kenyan national institutions for environmental action.
- Launch of joint restoration initiatives between RAJAPI-COP chapters in Kenya, Uganda, Cameroon, and Rwanda.
- Increased visibility for RAJAPI-COP across East Africa thanks to strong digital and media outreach.

Outlook :

- Organization of a Regional Forum on Ecological Landscape Restoration in Africa (Nairobi, 2025).
- Development of a pilot project on youth-led ecological corridors in the Rift Valley.
- Launch of an interactive map of youth restoration projects in RAJAPI-COP countries.

International Activity 4 : Participation in COY19 in Baku (Azerbaijan) and Launch of the RAJAPI-COP Collaborative Digital Platform

Date : November 7–9, 2024

Location : Baku, Azerbaijan

Context : 19th Conference of Youth on Climate Change (COY19), held in the lead-up to COP29

General Background :

COY19 is the largest global youth gathering on climate change, organized annually by YOUNGO—the official youth constituency of the UNFCCC. It serves as a unique platform for advocacy, capacity building, and intergenerational dialogue, bringing together over 1,000 young leaders from more than 140 countries.

RAJAPI-COP's Role and Contribution :

- Active participation in COY19 with an official delegation of young leaders from Central and West Africa.
- Presentation of the Local Conference of Youth (LCOY-Cameroon) organized by RAJAPI-COP Cameroon, officially recognized by YOUNGO, and contributing youth perspectives to the climate negotiation process.
- International launch of the RAJAPI-COP Collaborative Digital Platform, with participation from international partners, UNFCCC representatives, YOUNGO members, and youth-led networks.

Promouvoir l'innovation des jeunes pour la justice climatique et la biodiversité

Objectives of the Activity :

- Amplify the voice of African youth in international climate negotiations.
- Present innovative, collaborative climate solutions developed by RAJAPI-COP.
- Officially launch the RAJAPI-COP digital platform, designed to foster synergy, project co-development, and participatory monitoring of youth climate commitments across Africa

Overview of the RAJAPI-COP Platform :

Key Features :

- Interactive map of youth climate and biodiversity projects in Africa
- Collaborative workspaces by country, theme, and partner
- Participatory tracking tools for SDG and Paris Agreement youth commitments
- Knowledge hub with webinars, toolkits, and project calls
- Forums, mentoring sessions, and innovation labs

Key Partners :

YOUNGO, UNICEF, GIZ, UNFCCC, JVE, Senghor University, DYGLAF, COMIFAC Youth Climate Network

Results and Impacts :

- RAJAPI-COP recognized as a key youth actor in Francophone Africa's climate movement.
- The platform was highlighted among key youth initiatives by YOUNGO for COP29.
- New intercontinental partnerships established with youth networks from Central Asia, Eastern Europe, and Latin America.
- More than 150 African youth leaders engaged in the platform's adoption process.

Outlook Post-COY19 :

Gradual deployment of the platform in RAJAPI-COP's 16 member countries with local training workshops.

Launch of a Pan-African Climate Hackathon on the platform in 2025.

Advocacy for the platform's adoption as a youth engagement tracking tool in national climate-biodiversity strategies.

International Activity 5 : Participation in the UN-Habitat World Summit – Cairo, Egypt (2024) and Presentation of the Pan-African Project “Eco-Habitats Cameroon”

Event : UN-Habitat World Summit 2024 Location : Cairo, Arab Republic of Egypt

Date : October 4–7, 2024

Organized by : UN-Habitat, in partnership with the Egyptian Government, the African Union, and various sustainable urban development partners.

General Context :

This global summit brought together policymakers, urban planners, researchers, youth leaders, and civil society actors under the theme :

"For Green, Resilient, and Inclusive Cities in Africa and the World."

RAJAPI-COP's Participation and Role :

- Official member of the African Youth Delegation accredited by UN-Habitat.
- Organizer of a high-level side event titled :
- "Eco-Habitats Cameroon : Toward Sustainable Architecture and Resilient Communities in Africa."
- Presentation of the flagship project “ECO HABITAT AFRICA”, a pan-African initiative led by RAJAPI-COP to reimagine the African city of the future.

Goals of the Eco Habitat Africa Project :

- Promote ecological urban planning, integrating circular economy principles, bio-based construction, and renewable energy.
- Reduce the carbon footprint of African urban areas through innovative building materials and planning.
- Offer sustainable and affordable housing models, adapted to local cultural, climatic, and economic contexts.
- Strengthen the resilience of urban populations, particularly in response to climate change and social vulnerabilities.

Highlights of the RAJAPI-COP Workshop at the Summit :

- Presentation of prototype models for sustainable social housing in Cameroon.
- Interactive discussions on green architecture challenges and opportunities for African youth.

Promouvoir l'innovation des jeunes pour la justice climatique et la biodiversité

- Launch of the pilot project "Eco-Habitats Cameroon," to be implemented in 2025 in two regions : Centre and Littoral.

Workshop Participants :

- Youth delegations from Central and West Africa
- UN-Habitat sustainable urbanism experts
- Representatives from FAO, UNDP, African Green Building Network
- Architects and urban planners from Cairo and Yaoundé
- Partner organizations : RAJAPI-COP Egypt, DYF, AUYND, Architects Without Borders

Key Results :

- Recognition of Eco-Habitats as a model youth-led civil society initiative by UN-Habitat
- Establishment of three strategic partnerships to support pilot implementation in Cameroon and replication in Kenya and Senegal
- Inclusion of RAJAPI-COP's recommendations in the summit's final report on inclusive urban planning
- Capacity building for 70 African youth on green housing and green economy opportunities in urban settings

Short- and Medium-Term Perspectives :

- Creation of a Pan-African Network of Youth for Sustainable Architecture and Resilient Cities
- Development of a participatory technical guide on context-appropriate ecological housing
- Launch of the "Green Youth Cities" label by RAJAPI-COP in several African capitals starting in 2025
- Advocacy for the inclusion of youth in national urban planning and development frameworks

International Activity 6 : RAJAPI-COP's Participation in the Europe-Africa Climate Chance Summit

Marseille, France | March 31 – April 1, 2025

Event : Europe-Africa Climate Chance Summit 2025

Theme : "Accelerating local adaptation and decentralized cooperation in the face of climate change"

Promouvoir l'innovation des jeunes pour la justice climatique et la biodiversité

Organizer :

Climate Chance Association, in partnership with the Aix-Marseille-Provence Metropolis, the European Union, and numerous local governments and African networks.

Summit Objectives :

- Strengthen Europe-Africa cooperation in climate action
- Showcase initiatives led by local authorities, civil society, and non-state actors
- Provide a dialogue platform on financing, local resilience, and adaptation strategies

RAJAPI-COP's Contributions :

- Official participation as a pan-African youth network committed to climate justice
- Pitch Corner : Presentation of the project "Agroecology and Climate Resilience : Strengthening African Farmers' Capacities"
- Exhibition booth highlighting RAJAPI-COP's initiatives in climate education, biodiversity, and sustainable agriculture
- Bilateral meetings with European partners (local governments, NGOs, donors) to prepare joint actions for 2025–2026
- Youth advocacy for increased youth involvement in climate adaptation policies

Results / Impact :

- Increased international visibility for RAJAPI-COP
- New partnerships explored with French, Italian, and Belgian cities for pilot projects
- Strong interest in the "CongoBotanika" program and the Resilience Academy led by RAJAPI-COP
- Agreement on a future Europe-Africa cross-training session on local climate adaptation
- International Activity 7 : Participation in the First Summit of 1000 African Youth on Food Systems and Agroecology – Addis Ababa, Ethiopia (2024)

Event

The First Summit of 1000 African Youth on Food Systems and Agroecology was held from October 13 to 15, 2024, in Addis Ababa, Ethiopia. This continental event aimed to mobilize African youth around key issues related to agroecological transition and the continent's food sovereignty.

Main Organizer

The NGO Sustainable Development and Well-being, in partnership with African institutions, international donors, and engaged youth networks.

Promouvoir l'innovation des jeunes pour la justice climatique et la biodiversité

Summit Objectives

- Create a pan-African platform for youth engaged in agroecology and food system transformation.
- Identify innovative local solutions to address food insecurity, climate change, and soil degradation.
- Promote youth involvement in agricultural and rural development policies.

RAJAPI-COP's Participation

- RAJAPI-COP actively participated in this event as a delegated participant, represented by its Department of Agroecology and Food Sovereignty. On this occasion, RAJAPI-COP members :
- Took part in thematic workshops on agroecological transition, local seeds, and regenerative agriculture.
- Engaged with experts, young agripreneurs, and researchers from over 30 African countries.
- Presented ongoing actions under the Youth & Agroecology Program led by RAJAPI-COP in Ethiopia, Senegal, and the DRC.

Outcomes and Impact

- New partnerships established with African organizations working in sustainable agriculture.
- RAJAPI-COP integrated into the Youth for Agroecology Movement network.
- Strengthened capacity of RAJAPI-COP representatives in advocating for inclusive agricultural policies.
- Commitment from RAJAPI-COP to co-organize a Regional Youth & Agroecology Forum in Central Africa in 2025.

Perspectives

- Launch of a Youth Agroecological Innovation Lab within RAJAPI-COP.
- Sharing this experience at the Climate Chance Europe-Africa Summit 2025.
- Continued advocacy for the integration of youth into African food system reforms.
